

Nataly Ellen

System development
and analisys

About Me

I am a QA Analyst & Systems Analyst with a focus on test automation and software architecture (Azure DevOps, C#, JS). I combine technical rigor with Agile expertise and fluent communication. In my downtime, I'm a book lover who enjoys getting lost in stories like Beauty and the Beast and Jane Austen's classics.

Technical Skills

Quality Assurance & Testing

Test Automation: Selenium, Cypress

Testing Types: Automated Testing, Exploratory Testing, Regression, Smoke Testing and more.

API Testing: Postman, Insomnia.

Bug Tracking: Jira, Azure DevOps Boards.

Development & Programming

Languages: C#, JavaScript, PHP, C++, Python, Node.js, C++

Front-end: HTML5, CSS3, React.js, Reactive native,

Version Control: Git (GitHub/GitLab/Bitbucket), Git Flow.

Databases: SQL Server, MySQL, PostgreSQL.

DevOps & Methodology

CI/CD & Cloud: Azure DevOps, GitHub Actions.

Agile Frameworks: Scrum, Kanban.

Infrastructure Concepts: Docker, Microservices architecture.

Languages

English: Fluent (C1/C2)

Spanish: Upper-Intermediate (B2).

Portuguese: Native 

Russian: Intermediate (B1).

Soft skills

- **Analytical Thinking:** Ability to decompose complex systems to find edge cases.
- Communication:** Clear bug reporting and cross-functional collaboration between Dev and Product teams.
- Problem Solving:** Quick identification of root causes in production environments.
- **Adaptability:** Fast learner of new stacks and tools

Education

Technologist in Systems Analysis and Development

Fatec Sebrae

2022 - 2024

My degree provided a rigorous, hands-on foundation in the full software development lifecycle. The curriculum focused on software architecture, database management (SQL), and multiple programming paradigms (Object-Oriented, Functional). Key areas of study included:

- **Software Engineering:** Requirements gathering, UML modeling, and Agile methodologies (Scrum/Kanban).
- **Development:** Full-stack development with a focus on logic, data structures, and algorithmic efficiency.
- **Infrastructure:** Operating systems, networking, and security fundamentals.

Experience

Last personal project for my portfolio

Dashboard-Ecommerce for store control

Quality Assurance Junior

2023 - now

/Systems

I work as a QA Analyst responsible for ensuring software quality at all stages of the development lifecycle (SDLC). My activities range from analyzing user stories in an Agile environment to rigorously executing exploratory and regression tests. I use Azure DevOps for bug management and task tracking, and I apply my knowledge of programming logic and databases to validate integrations and automate critical workflows. I work in direct collaboration with developers and Product Owners to ensure that deliverables meet business requirements and provide a flawless user experience.

Quality Assurance Internship

/Systems

2022 - 2024

Responsible for creating test scenarios, test automation, version releases, and acceptance criteria.

Skills: Git · Azure DevOps Server
